Title (EN):

Mainstreaming of gender competence into Monash medical curriculum

Abstract description (EN):

I have mainstreamed gender competence into the medical curriculum at Monash. This case-based curriculum has sex/gender difference evidence for patients doctors and the insitutional practice integrated into all cases at year levels. Clinical tutors are trained to teach and rolemodel practice in a gender competent fashion for medical students. Our aim is to graduate doctors who understand and can manage difference in the patients in an evidence based way.

Keywords:

gender comeptence, medical education, clinical practice, clinical

Free Comments:

The curriculum development part of the project is over, Dr Nobelius now conducts ongoing clinical tutor training to maintain the practice and teaching elements. The methodology was through advocacy, curriculum, development staff training.
